

Draka Aviation receives Quality Support Award from Airbus Draka Industry & Specialty

Airbus, the leading aircraft manufacturer, presented Draka Aviation with a 'Quality Support Award' at its Suppliers Day held December 15 at the Airbus head-office in Toulouse.

This award is a token of recognition by an important customer and underscores the successful Airbus-Draka partnership.

During the Award ceremony, Alain Jeanguillaume, President of Draka Aviation, informed the management of Airbus of Draka's ongoing plans and projects in support of maintaining our position as preferred supplier to Airbus.

During the Suppliers Day participants visited an A380 production line and witnessed the assembly process. The 700 kilometers of Draka cable needed to provide the Airbus 380 with electrical power is a critical component in this high-tech aircraft.
